SUMMARY

Skilled Mobile Application Developer specializing in Flutter, Dart, and Swift. Develops responsive UI components for Android, iOS, and desktop platforms while implementing clean architecture and state management frameworks such as BLoC, GetX, and MVVM. Integrates backend solutions using REST APIs, Firebase, and SQL databases, leveraging Git and Agile methodologies to ensure quality delivery.

SKILLS

Technical Skills Flutter & Cross-Platform Development

- Flutter (Android, iOS & Desktop)
- Dart
- Custom Widgets & Responsive UI
- Platform Channels
- Third-Party SDK Integration
- Face Detection & Face Recognition
- Bluetooth Low Energy (BLE) Integration
- QR & Barcode Scanner Integration
- Push Notifications (Firebase Cloud Messaging)
- Deep Linking

Architecture & State Management

- Clean Architecture
- MVVM
- BLoC / Cubit
- GetX
- Repository Pattern
- Dependency Injection
- SOLID Principles

Backend & Data

- RESTful APIs
- Firebase Authentication
- Firebase Firestore

- Firebase Cloud Messaging (FCM)
- WebSocket Integration
- SQLite
- MySQL
- JSON Serialization & Parsing

Native iOS Development

- Swift
- SwiftUI
- Alamofire
- SwiftData
- Core Data
- Modular UI Components

Tools & Engineering Practices

- Git & GitHub
- Postman
- Android Studio
- VS Code
- Xcode
- Agile/Scrum
- Unit Testing
- Widget Testing
- Performance Optimization
- App Deployment (Google Play Console & Apple App Store Connect)

EXPERIENCE

02/2026 - Current ATI Limited Dhaka	Flutter Developer
02/2024 - 02/2026 ATI Limited Dhaka	Jr. Flutter Developer
08/2023 - 02/2024 ATI Limited Dhaka	Intern Flutter Developer

EDUCATION

Dhaka

Bachelor of Science in Computer Science & Engineering

Eastern University

PROJECT EXPERIENCE

LAAN POS

Designed and developed a cross-platform POS application with Clean Architecture, BLoC, and REST API integration. Implemented inventory management, sales processing, invoicing, barcode scanning, offline data persistence using SQLite, and responsive UI optimized for different screen sizes.

EMR & Patient Registration System (Desktop)

Built a desktop-based Electronic Medical Record (EMR) system using Flutter Desktop with Clean Architecture and Repository Pattern. Developed patient registration, appointment scheduling, medical record management, and reporting modules while integrating REST APIs, SQLite, and reusable UI components.

JRC ERP (Android & iOS)

Play Store: https://play.google.com/store/apps/details?id=com.jrcgroupbd.erp&pcampaignid=web_share

Developed enterprise-grade HR modules including Face Recognition Attendance, GPS-based location tracking, Leave Management, Movement Management, and Meal Management. Implemented ML Kit Face Detection, REST API, Firebase Cloud Messaging (FCM), Deep Linking, BLoC, Dependency Injection, and optimized API performance with scalable architecture.

Livora (Android)

Play Store: https://play.google.com/store/apps/details?id=com.ucllc.mysg&pcampaignid=web_share

Developed a cross-platform community application that enables social networking, real-time community posts, Islamic prayer schedules, live exchange rate updates, job card generation with PDF export, and access to government information services. Implemented REST API integration, Firebase Cloud Messaging (FCM), PDF generation, Deep Linking, Responsive UI, Clean Architecture, BLoC, Repository Pattern, and Dependency Injection while optimizing performance and ensuring a scalable, maintainable codebase.

PharmaTrack

Developed a field force automation solution for pharmaceutical representatives featuring offline-first architecture, SQLite, REST API, Google Maps & Location Services, QR/Barcode Scanning, employee activity tracking, order management, and real-time synchronization using Clean Architecture and BLoC.

Vascular BD (Android)

Developed a healthcare application with Firebase Authentication, REST API integration, Push Notifications (FCM), appointment scheduling, patient profile management, and medical content delivery. Built responsive UI with reusable widgets following MVVM and Clean Architecture principles.
